`Correction:` small typo at 13:45, sparsity of the matrix = no.of zero elements / total elements

1. We have updated the Amazon fine food reviews notebook, these notebooks are the way we have done the preprocessing is little different from what we have explained in the videos and the remaining concepts are same.

2. the updated notebooks are self-explanatory, if you couldn't understand any snippet of code, please drop an email at team@appliedaicourse.com

3. Click here to download ipython notebooks

4. if you are having an error in importing statements, please install the packages like "a. open anconda prompt, b. conda install package-name"
